

ESOGÜ Electrical-Electronics Engineering Department

COURSE CODE: 151223557 - 151243557

COURSE TITLE: Digital Systems I

Semester	Weekly Hours		COURSE			
	Theoretical	Practical	Credits	ECTS	Type	Language
3	4	0	4	7	Compulsory (x) Elective ()	Turkish () English (x)
Write the credit (for non-credit courses weekly hours) below (If necessary distribute the credits.).						
Math and Basic Science		Electrical Engineering [mark (√) if there is high design content]		General Education	Humanities	
0		3 (√)		0	0	
Assessment		THEORETICAL-PRACTICAL COURSES			LABORATORY COURSES	
		Type	Number	%	Activity Type	Number %
Midterm		Midterm	1	40	Quiz	
		Quiz	3	20	Lab performance	
		Homework			Report	
		Project	1	10	Oral exam	
		Other (.....)			Other (.....)	
Final			1	30		
Makeup exam (Oral/Written)		Oral and Written				
Prerequisites						
Brief content of the course		Digital systems, Combinational Circuit Analysis and Design, Combinational Circuits (Decoder, Encoder, Multiplexer, Arithmetic), Hardware Description Language (HDL), Sequential Circuits Analysis and Design				
Objectives of the course		The aim of the course is to introduce combinational and sequential circuit components and to teach analysis and design techniques for combinational and sequential circuits.				
Contribution of the course towards professional education		Students recognize basic elements of digital systems and learn system design using combinational and sequential circuits. And also they know the use of HDL for digital circuit analysis and design.				
Outcomes of the course		Students: 1. recognize elements of digital systems 2. define combinational circuits (logic gates, decoders, encoders, etc.) and can explain their functions. 3. analyze and design combinational circuits 4. defines storage elements (latches and flip-flops) and their functions 5. analyze and design sequential circuits. 6. defines programmable logic devices. 7. use HDL in simulation and design of the digital systems.				
Textbook of the course		Logic and Computer Design Fundamentals, M.Mano and R.Kime, Prentice Hall, 2004, 4th edition.				
Other reference books		Digital Design Principles and Practice, J.F. Wakerly, Prentice Hall 2001. Digital Design, M. Mano, Prentice Hall 2002.				
Required material for the course						

WEEKLY PLAN OF THE COURSE	
Week	Topics
1	Digital Computers and Information
2	Boolean Algebra and Karnough Maps
3	Logic IC Circuits and Combinational Logic Design
4	Programmable Implementation Technologies
5	Combinational Logic Functions and Circuits
6	Combinational Logic Implementations
7	Arithmetic Functions and Circuits
8	Midterm
9	Midterm
10	Combinational Circuits and HDL
11	Sequential Circuits, Latches and Flip-Flops
12	Sequential Circuit Analysis
13	Sequential Circuit Design
14	Sequential Circuits and HDL
15,16	Final

NO	OUTCOMES OF THE PROGRAMME	4	3	2	1
1	Adequate knowledge of mathematics, science and Electrical and Electronic Engineering; ability to practice theoretical and practical knowledge of these areas into modeling and solving complex problems of Electrical and Electronic Engineering	X			
2	Ability to identify complex engineering problems in Electrical and Electronic Engineering and related fields, for this purpose having skills to formulate, select and apply appropriate methods.		X		
3	Having skills to apply modern design methods to design a complex system, process, equipment or product that should work under realistic conditions and constraints and satisfy specific requirements concerning the Electrical and Electronic Engineering.				
4	Having skills to develop, select and apply modern techniques and tools needed to analyze and solve complex applications in Electrical and Electronic Engineering, skills to use information technology effectively.		X		
5	Skills to design and conduct tests, collect data, analyze results, and interpret data for the experimental investigation of complex problems in Electrical and Electronic Engineering				
6	Ability to function effectively as an individual and as a member of teams within the discipline and in multidiscipline areas.				
7	Communicating effectively in oral and written form both in Turkish and English. Effective report writing and understanding written reports, preparing design and manufacturing reports, making effective presentations, skills to give and receive clear and concise instructions.		X		
8	Awareness of the necessity of lifelong learning, access to information, monitoring developments in science and technology and the ability to self-renewing				
9	Understanding of professional and ethical responsibility				
10	Information on project management, change management and risk management practices, awareness on entrepreneurship and innovation, knowledge on sustainable development.				
11	Information about universal and societal effects of engineering applications on health, safety and environment; awareness of the legal consequences of engineering solutions.				

Scale for assessing the contribution of the course to the program outcomes:

4: High

3: Medium

2: Low

1:None
